

TARGA FLEET EMERGENCY

When an emergency is triggered, prompt intervention is vital. Sometimes it can be the difference that saves a life.

Fleet management and tracking system meeting the specific needs of those who have to coordinate and manage first aid vehicles.

+ CONTROL

Constant monitoring of your vehicles: where they are, what state they are in

- COSTS

Minori spese di carburante e di manutenzione

+ SECURITY

of the correct and continuous functionality of vehicles

Your needs

- › Certification and reporting of the activity carried out with details of time and place
- › Reporting the kilometres travelled and integration with invoicing
- › Planning vehicle scheduled maintenance
- › Reducing emergency intervention times

Our solution

- › Certification of the intervention carried out with details of time and place
- › Checking in real time the vehicle current location
- › Effective management of vehicle assignments and reduction in intervention time
- › Reduction of administration costs
- › Cost reduction thanks to automatic management of scheduled maintenance

targa Telematics

HOW IT WORKS

A GPRS/SMS GPS (black box) is installed on board the vehicle that transmits in real time its location and the details relative to the state and use of the vehicle itself.
Data is recorded by the web-based TARGA FLEET app, that can be consulted by operators also via smartphone or tablet.

PROMPT ALLOCATION OF VEHICLES

Your needs

- › Viewing on the map, in real time, the exact location of all vehicles and sending the nearest vehicle to it, by the quickest route.

Our solution

- › Checking the current location of the vehicle on map
- › Checking its position, direction and speed
- › Checking the current state of the vehicle

ACTIVITY CERTIFICATION

Your needs

- › Creating reports to certify the intervention activity carried out with details about the place, time and any other useful information.

Our solution

- › Certification of the activity carried out
- › Creation of reports about routes, events, maintenance, etc.

MAINTENANCE MANAGEMENT

Your needs

- › Pianificare la manutenzione
- › Planning maintenance
- › Recording interventions carried out
- › Preventing vehicle downtime due to poor maintenance
- › Preventing vehicle deterioration

Our solution

- › Planning maintenance according to the vehicle hire calendar
- › Planning maintenance in compliance with regulations
- › Automatic alerts when the threshold is reached
- › Recording and history of all maintenance works
