

TARGA FLEET MANAGEMENT

Coordination is a key factor:
Targa Telematics is your strategic partner

Solution dedicated to the fleet management of operators in the Facility management and utility sector: maintenance concerns, technical service, energy & utilities.

+ CONTROL

Constant monitoring of your vehicles: where they are, what state they are in

- COSTS

Fewer fuel and maintenance costs

+ SECURITY

of the correct and continuous functionality of vehicles

Your needs

- › Staff might need to start their activity without going to the office first
- › Managing interventions promptly
- › Planning vehicle scheduled maintenance
- › Identifying improvement areas with the activity certification tool

Our solution

- › Electronic stamping of onboard staff
- › Checking in real time the vehicle current location
- › Effective management of vehicle assignments and reduction in intervention time
- › Certification of the intervention carried out with details of time and place
- › Planning maintenance
- › Monitoring routes covered outside working hours

HOW IT WORKS

Thanks to the installation on board vehicles of a GPRS/SMS GPS (black box), it is possible to know in real time the position and other data (speed, driver, entry/exit from pre-defined areas), consulting a web-based app available on smartphones and tablets too.

PROMPT ALLOCATION OF VEHICLES

Your needs

- › Viewing on the map, in real time, the exact location of all vehicles and sending the nearest vehicle to it, by the quickest route.

Our solution

- › Checking the current location of the vehicle on map
- › Checking its direction and speed
- › Checking the current state of the vehicle

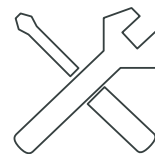

ACTIVITY CERTIFICATION

Your needs

- › Creating reports to certify the intervention activity carried out with details about the place, time and any other useful information.

Our solution

- › Certification of the activity carried out
- › Creation of reports about routes, events, maintenance, etc.

MAINTENANCE MANAGEMENT

Your needs

- › Planning maintenance
- › Recording interventions carried out
- › Preventing vehicle downtime due to poor maintenance
- › Preventing vehicle deterioration

Our solution

- › Planning maintenance according to the vehicle hire calendar
- › Planning maintenance in compliance with regulations
- › Automatic alerts when the threshold is reached
- › Recording and history of all maintenance works
