

# TARGA FLEET TRANSPORTATION

Control, Security, Efficiency: delivered.

Solution dedicated to companies operating in freight services:  
hauliers, transport on own account or on account of third parties

## + CONTROL

Constant monitoring  
of your vehicles:  
where they are, what  
state they are in

## - COSTS

Fewer fuel and  
maintenance costs

## + SECURITY

of the correct and  
continuous  
functionality of  
vehicles

### Your needs

- › Optimizing "delivery turnover" and managing "last minute" deliveries promptly
- › Reducing telephone interaction for resource coordination
- › Optimizing routes
- › Certifying the activity performed at the customer's both in real time and in the final balance
- › Managing scheduled maintenance autonomously
- › Managing the security of both vehicle and transported goods
- › Recovering vehicles in case of theft

### Our solution

- › Checking in real time the vehicle current location
- › Planning vehicle scheduled maintenance
- › Monitoring drivers' driving time and vehicle use outside normal working hours
- › Checking routes travelled to verify and optimizing them

# HOW IT WORKS

Thanks to the installation on board vehicles of a GPRS/SMS GPS (black box), it is possible to know in real time the position and other data (speed, driver, entry/exit from pre-defined areas), consulting a web-based app available on smartphones and tablets too.

## MONITORING

### Your needs

- › Monitoring vehicle movements in real time
- › Optimizing missions
- › Reducing communication operational costs

### Our solution

- › Electronic stamping for driver recognition
- › Recovery of the stolen vehicles thanks to the Operations Center, available 24/7 and connected to the Police all over Europe
- › Automatic alarms in case of towing or tampering of the battery
- › Blocking/releasing engines from a remote position

## ACTIVITY CERTIFICATION

### Your needs

- › Creating reports to certify the intervention activity carried out with details about the place, time and any other useful information.

### Our solution

- › Detailed certification of the activity carried out
- › Creation of reports about routes, events, maintenance, etc.

## MAINTENANCE MANAGEMENT

### Your needs

- › Planning maintenance
- › Recording the interventions carried out
- › Preventing vehicle downtime due to poor maintenance
- › Preventing vehicle deterioration

### Our solution

- › Planning maintenance according to the vehicle hire calendar
- › Planning maintenance in compliance with regulations
- › Automatic alerts when the threshold is reached
- › Recording and history of all maintenance works
